(Versión: June 18, 2020)

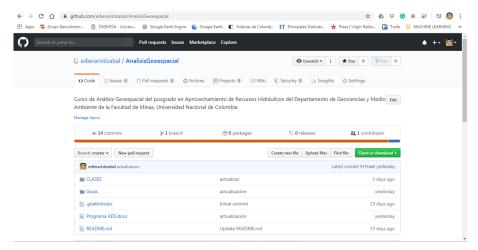

Objetivos del curso

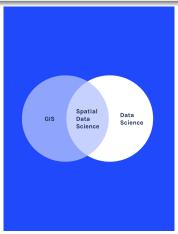

Objetivos y alcances del curso

El curso Análisis Geoespacial está orientado para estudiantes de posgrados que deseen formarse como GDS (Geospatial Data Science) adquiriendo conocimientos sobre sensores remotos y datos geoespaciales en un contexto ambiental, utilizando herramientas tipo Sistemas de Información Geográfica (SIG), Google Earth Engine (GEE), QGIS, Big Data, y programación en lenguaje Python.

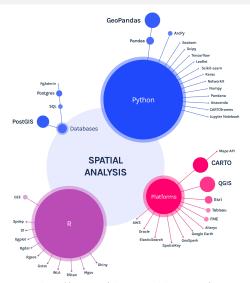

El curso es teórico - práctico. Se dictarán clases teóricas con las técnicas y modelos a utilizar, y clases prácticas donde se resolverán dudas con el manejo de las herramientas. El curso se evaluará a través de un trabajo individual durante todo el curso, donde el estudiante implementará en una cuenca de su elección las herramientas de análisis presentadas en el curso.

Geospatial Data Science

Geospatial data science (GDS) is a subset of Data Science that focuses on the unique characteristics of spatial data, moving beyond simply looking at where things happen to understand why they happen there.
